This packet, which focuses on reading comprehension, provides teachers and parents with a wide variety of activities to use at home or in the classroom to enhance a reading program. The comprehension activities have been selected to provide opportunities for students to practice a variety of reading skills, and an assessment rubric helps you track progress in achieving those skills. The various levels available allows you to select the one most appropriate for an individual student or class. The world's favorite children's series, fully revised with brand new components! A new edition of geog.1 workbook, providing engaging support for the new edition geog.1 Student Book - which has been revised and updated to deliver the new Programme of Study for Geography at Key Stage 3 (for teaching from 2014). The six student Reading 1 texts contain a variety of colorfully illustrated Bible stories, biographies, fiction, nonfiction articles, poems, and plays. Each selection is developed to incorporate phonics, English skills, word families, and service words. Stories about two Christian families provide good role models. Selections were carefully chosen or written to help students develop a Christian worldview. - Publisher. In April 2002, Jeffrey Fouts (2002) presented a longitudinal study of student performance in Washington using Washington Assessment of Student Learning (WASL) results from 1998 to 2001. Although constrained by the lack of individual student identification numbers at that time, he concluded that success on the WASL in the 4th grade was a strong predictor of achieving success in later grades. The opposite was also true; starting at the lowest levels of the WASL in the 4th grade strongly predicted less success in meeting the standards in later testing. According to Fouts, "A 4th grade Level 4 reading student was 28 times more likely to have met the reading standard three years later than was a 4th grade Level 1 reading student" (p. 20). Results were similar for math testing. These dramatic findings highlighted the need for assisting students early in their academic experience. However, according to Fouts the current education system did not "appear to be serving these

students adequately" (p. 21). This study is an attempt to replicate and extend Fouts' 2002 study using the most recent data. Whereas Fouts used data from 4th and 7th grades to predict 10th grade achievement, the current study follows student progress from 4th through 10th grades. The following questions encompass Fouts' questions, but extend the findings through the more recent data: (1) How did students who took the 2001 7th grade reading and math WASL perform three years later on the 2004 10th grade WASL?; (2) How did students in different levels on the WASL in 1998 4th grade perform in 2001 7th and 2004 10th grades?; (3) What percentage of students scoring at various levels on the 4th grade WASL in 1998 met the WASL standard in the 10th grade in 2004?; and (4) Are there student factors that are related to student performance over time? A total of 8,463 students were included in the final database. The students in this study represented 33 districts and 318 schools around the state. The findings presented in this report extend Fouts (2002) study and are consistent with his report. The examination into student achievement over time revealed that past achievement was the best predictor of future achievement. One variable that is often cited as being influential in student achievement is ethnicity. The current study found that the likelihood of moving out of Level 1 reading was the greatest for Asian/Pacific Islander students and the least for Black/African American students. For math, Asian/Pacific Islander and White students were more likely to move out of Level 1 than Hispanic and Black/African American students. Hierarchical regressions revealed that mothers' education, amount of time per week doing homework, and three interaction terms predicted 16% of the variance in 10th grade reading achievement. Taken together, mothers' education, amount of time per week doing homework, and two interaction terms accounted for 23% of the variance in math achievement. The authors' study affirmed Fouts' (2002) conclusion that early success on the WASL was a strong predictor of later success. Although there were some differences between his predicted 10th grade scores and their actual scores, the dynamics of achievement progression over the grades was the same. Their last finding implies that there are some student practices that may be potentially helpful in partially mitigating the lack of early success. This is an area that deserves further investigation. This may assist leaders and practitioners in their quest for improving school success. (Contains 12 tables, 2 figures and 3 footnotes.) The Jacob's Ladder Reading Comprehension Program targets reading comprehension skills in high-ability learners by moving students through an inquiry process from basic understanding to critical analyses of texts, using a field-tested method developed by the Center for Gifted Education at William & Mary. Students in grade 4 will learn to comprehend and analyze any reading passage after completing the activities in Jacob's Ladder, Grade 4 (2nd ed., previously published as Level 2). Research conducted by the Center for Gifted Education with Title 1 students demonstrated that the Jacob's Ladder Reading Comprehension Program delivers results related to improved reading comprehension, increased critical thinking, and an enhanced interest in reading. Using skill ladders connected to short stories, poetry, essays, and nonfiction, students move from lower order, concrete thinking skills to higher order, critical thinking skills. The ladders include multiple skills necessary for academic success, covering language arts standards such as sequencing, determining cause and effect, classifying, inferencing, and recognizing main ideas. The second edition of the book builds off the previous Level 2 edition, including new readings and ladders for student use. This book provides teachers with an explanation of the nature of supplementary tasks that scaffold reading comprehension. Also included is an overview of the goals and objectives of the Jacob's Ladder tasks and suggestions for implementation, giving every teacher the tools needed to promote successful reading comprehension. Optional Student Workbook Packs In addition to this teacher's guide, companion student workbooks are available for the short story readings, the poetry readings, and the nonfiction readings. The student workbooks feature more space for student responses and make checking and providing feedback on student work easier than ever. Interchange Fourth Edition is a fully revised edition of Interchange, the world's most successful series for adult and young-adult learners of North American English. The course has been revised to reflect the most recent approaches to language teaching and learning. It remains the innovative series teachers and students have grown to love, while incorporating suggestions from teachers and students all over the world. This edition offers updated content in every unit, grammar practice, and opportunities to develop speaking and listening skills. Interchange Fourth Edition features contemporary topics and a strong focus on both accuracy and fluency. Its successful multi-skills syllabus integrates themes, grammar, functions, vocabulary, and pronunciation. The underlying philosophy of the course remains that language is best learned when it's used for meaningful communication. The Student's Book offers a well-paced, balanced approach to teaching grammar, vocabulary, pronunciation and the four skills of reading, listening, speaking and writing, with an emphasis on mixed abilities. Culture and CLIL feature in every unit. Brain Power Enrichment Programs aim to develop problem-solving abilities in students who wish to improve their skills. Additionally, the programs may provide challenging, stimulating and inspirational learning experiences through engagement with problem solving for gifted students. This book accompanies a Level One student through his/her second semester of the problem solving program (or it may be used independently as a problem solving workbook). All Brain Power programs are based on a step-by-step approach, which enables students to understand problems of increasing complexity. Level One begins to equip students typically in grades 4 to 6 with various problem solving strategies and techniques, and supports the application of these skills to math, language arts, study habits and the general learning process. In Level One, students are introduced to four critical steps in problem solving: 1) Understanding the problem 2) Defining a plan or strategy 3) Solving the problem 4) Checking the answer. The implications for improving ones problem solving skills are numerous.

These include a more positive attitude toward math and science, improved thinking flexibility and creativity in all subject areas, as well as increased success in academic, gifted, university admissions, and professional program tests (many of which are designed with an emphasis on assessing higher-order thinking skills). Moreover, knowledge of a range of problem solving strategies, coupled with experience in their application, have benefits which transcend the classroom and enter the realm of professional, social and intellectual accomplishment. The Your Life series is the only whole-school solution for combining Citizenship and PSHE at Junior and Middle Years.
