with the issues related to rights and interests in all kinds of property and assets – immovable, movable, and personal property; how property rights are acquired; fiduciary mechanisms; and security considerations. Lawyers who handle transnational disputes and other matters concerning property will appreciate the explanation of specific terminology, application, and procedure. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. The book includes ample references to doctrine and cases, as well as to relevant international treaties and conventions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for any practitioner faced with a property-related matter. Lawyers representing parties with interests in Taiwan will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative property law. An account of the legal regime of straits and the allocation of rights and duties relating to transit passage. To provide valuable legal service to persons in today's Europe, practitioners must be conversant in both national and transnational law. At the European level, the Principles of European Contract Law

(PECL) are an increasingly important element of contract law, together with national contract law, as contained in Civil Codes and various national statute. Accordingly, Kluwer Law International has initiated a series of volumes, under the direction of prof. Hondius of the University of Utrecht, comparing PECL with the most important European legal systems. This volume on Italian law is the second in the series. Using a straightforward comparative method, the editors' analysis not only reveals a significant area of convergence between the PECL and Italian contract law, but also highlights the main differences between the two bodies of rules. The reasons for these differences, both legal and non-legal (such as historical, social, economic), are clearly set forth. The book provides complete texts, with annotations, of the PECL and the corresponding Italian rules. The presentation proceeds as follows: general provisions (scope of application, general duties, terminology) formation of contracts (general provisions, offer and acceptance, liability for negotiations) authority of agents (general provisions, direct and indirect representation) validity interpretation contents and effects performance non-performance and remedies in general particular remedies for non-performance (right to performance, withholding performance, termination of the contract, price reduction, damages and interest) The editors' commentary includes extensive reference to case law and legal doctrine at all essential points. In this way they provide a comprehensive description of the law in action as well as its evolving trends. In addition, incisive essays by two leading experts in the field of comparative law, prof. Rodolfo Sacco and prof. Michael Joachim Bonell, analyse the relationship of the PECL and Italian law and its wider framework in the harmonisation of private law at the European and

international levels. The book is a valuable handbook and guide for both foreign and Italian lawyers. For non-Italian lawyers, be they practitioners or academics, it provides a concise but complete and up-to-date outline of current Italian contract law, organized on the basis of a system (PECL) with which many European lawyers are familiar. For Italian lawyers, it offers a clearer insight into a wider European legal contract system whose importance in the evolution of a common European private law is growing rapidly. Principles of European Contract Law Series 2 University can be a psychologically distressing place for students. Empirical studies in Australia and the USA highlight that a large number of law students suffer from psychological distress, when compared to students from other disciplines and members of the general population. This book explores the significant role that legal education can play in the promotion of mental health and well-being in law students, and consequently in the profession. The volume considers the ways in which the problems of psychological distress amongst law students are connected to the way law and legal culture are taught, and articulates curricula and extra-curricula strategies for promoting wellbeing for law students. With contributions from legal academics, legal practitioners and psychologists, the authors discuss the possible causes of psychological distress in the legal community, and potential interventions that may increase psychological well-being. This important book will be of interest to legal academics, law students, members of the legal profession, post-graduate researchers as well as non-law researchers interested in this area. Law | Book | Culture in the Middle Ages takes a detailed view on the role of manuscripts and the written word in legal cultures, spanning the medieval period across western and central Europe. Undoubtedly one of the paragons of public international law in contemporary times, Colin Warbrick is truly held in high esteem by his peers at home and abroad. His breadth of knowledge is reflected in a large number of scholarly works and in his appointment as a Specialist Adviser to the Select Committee on the Constitution of the House of Lords and as a consultant to both the Council of Europe and OSCE. This "festschrift" celebrates on his retirement as Barber Professor of Jurisprudence at Birmingham University, his extraordinary talent and academic career by bringing together a group of eminent judges, practitioners and academics to write on international human rights, international criminal justice and international order

and security, fields in which Professor Warbrick has left an indelible mark. *Priests of the Law* tells the story of the first people in the history of the common law to think of themselves as legal professionals. In the middle decades of the thirteenth century, a group of justices working in the English royal courts spent a great deal of time thinking and writing about what it meant to be a person who worked in the law courts. This book examines the justices who wrote the treatise known as *Bracton*. Written and re-written between the 1220s and the 1260s, *Bracton* is considered one of the great treatises of the early common law and is still occasionally cited by judges and lawyers when they want to make the case that a particular rule goes back to the beginning of the common law. This book looks to *Bracton* less for what it can tell us about the law of the thirteenth century, however, than for what it can tell us about the judges who wrote it. The judges who wrote *Bracton* - Martin of Pattishall, William of Raleigh, and Henry of Bratton - were some of the first people to work full-time in England's royal courts, at a time when there was no recourse to an obvious model for the legal professional. They found one in an unexpected place: they sought to clothe themselves in the authority and prestige of the scholarly Roman-law tradition that was sweeping across Europe in the thirteenth century, modelling themselves on the jurists of Roman law who were teaching in European universities. In *Bracton* and other texts they produced, the justices of the royal courts worked hard to ensure that the nascent common-law tradition grew from Roman Law. Through their writing, this small group of people, working in the courts of an island realm, imagined themselves to be part of a broader European legal culture. They made the case that they were not merely servants of the king: they were priests of

the law. This is a student textbook structured around a full teaching semester that uses an innovative teaching method for business students of company law. "The UNCLOS has been called a constitution for the oceans and is critically important today in a world rocked by climate change and

biodiversity loss, and where deep seabed resources are potentially of vital strategic importance. It is absolutely crucial to find new ways to manage the common heritage of mankind, while navigating the priorities and expectations of those who depend on the oceans. Equally, peace at sea is made possible by the UNCLOS. Koh discusses current threats to maritime security. He explains the intricacies of the disputes in the South China Sea and the success of maritime boundary conciliation between Australia and Timor-Leste. What can be learned from the success of UNCLOS? How can we build on that success, and manage the new tensions that arise in the Law of the Sea?"--Page 4 de la couverture. A clear and precise overview of the key aspects of German business law. Written by attorneys involved in the daily practice of business law in Germany, this book is aimed at people who wish to familiarise themselves quickly with the German legal system and the manner in which it influences business purchases, establishment, operations and liquidations. Throughout, special attention has been paid to highlighting and explaining the differences between the German legal system and that of the United States, although the intention is to provide information that will prove valuable to all foreigners, particularly business people and lawyers advising clients with an interest in doing business in Germany. Leading Works in Law and Religion brings together leading and emerging scholars in the field from the United Kingdom and Ireland. Each contributor has been invited to select and analyse a 'leading work', which has for them shed light on the way that Law and Religion are intertwined. The chapters are both autobiographical, reflecting upon the works that have proved significant to contributors, and also critical analyses of the current state of the field, exploring in particular the

interdisciplinary potential of the study of Law and Religion. The book also includes a specially written introduction and conclusion, which critically comment upon the development of Law and Religion over the last 25 years and likely future developments in light of the reflections by contributors on their chosen leading works. From Law and Literature to Legality and Affect argues for the continued vitality of Law and Literature. Traditional methods of Law and Literature are combined with work in critical media studies, affect, and cultural narratology to address topics such as ethnonationalism, anti-immigration sentiment, and systemic racism in Germany and the United States. Taking stock of the diversification of the field at fifty years, this book understands Law and Literature as a political project. It has a precedent in inaugural Law and Literature texts such as Jacob Grimm's *Von der Poesie im Recht* (On the Poetry in Law) from 1815/16, which imagined an alternative legal order that was grounded in the unity of law, poetic language, and feeling. The political thrust of Law and Literature continues up into the present in the arts of BlackLivesMatter, which document and resist police violence. Law and Literature offers keys for understanding how legal identities are constructed, for analyzing how legal texts are constructed, and for comprehending how cultural-legal issues are mediated affectively. Using cultural, medial, affect theoretical, and narrative analyses of law, a revitalized Law and Literature offers a set of methods and theories with which to address the most pressing issues of the present. The adoption of the Personal Data Protection Act has transformed the legal regime for data protection in Singapore. This book explains the history and evolution of data protection in Singapore, highlights issues that will need to be worked out in practice

Bringing together leading scholars and practitioners in the field, the book will be of interest to the academic, legal and business communities. Key questions considered in the book include how to reconcile notions of privacy in an information age, and how national laws can regulate an increasingly interconnected world. The first comparative introduction for students on the national laws governing religion in Europe, it examines national laws, particularly as they affect the attitudes of states towards religion, religious freedom and discrimination, and the legal position and autonomy of religious organizations. advice about life at big law firms for people of color What do young people of color aspiring to careers in the law need to know about life at big law firms? What do law schools need to do to prepare them? What do the firms themselves need to do to attract, retain, and promote them? In *Raising the Bar*, four partners of color from leading law firms engage in a no-holds-barred conversation about what it takes to make it in big law using their own journeys to the top to discuss how law firms can do a better job of attracting and holding on to a more diverse set of young attorneys. They also offer advice to the attorneys themselves on how to succeed in a culture that has long excluded them, including finding mentors among those who don't look like you, building a portable toolkit of skills, establishing key connections outside the firm, and staying "true to you," even as young associates of color navigate the foreign terrain of insular firm culture. The book also includes a section of concrete advice from diversity coordinators at several top law firms.
