**Antistatic Sprays Nov 14 2019 Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center**

**The Terrible Privacy Of Maxwell Sim Feb 16 2020** **The Terrible Privacy of Maxwell Sim is Jonathan Coe's latest heart-breaking and hilarious novel Maxwell Sim could be any of us. He could be you. He's about to have a mid-life crisis (though eh doesn't know it yet). He'll be found in his car in the north of Scotland, half-naked and alone, suffering hypothermia, with a couple of empty whisky bottles and a boot full of toothbrushes. It's a far cry from a restaurant in Sydney, where his story starts. But then Maxwell Sim has, unknowingly, got a long way to go. If he knew now about his lonely journey to the Shetland Isles, or the truth about his father and the folded photograph, or the mystery of Poppy and her peculiar job, or even about Emma's lovely, fading voice, then perhaps he's stay where he was - hiding from destiny. But Max knows none of it. And nor do you - at least not yet. . . Equal parts funny and moving, The Terrible Privacy of Maxwell Sim will be cherished by readers everywhere, from fans of David Nicholls to Will Self. 'Witty, unexpected and curiously unsettling. Coe carries it off with empathy, comedy and a ventriloquist's ear for idiom' Literary Review 'Clever, engaging, spring-loaded with mysteries and surprises' Time Out 'Masterly, highly engaging. Coe's eye for the details of contemporary life remains as sharp as ever' Daily Mail Jonathan Coe's novels are filled with biting social commentary, moving and astute observations of life and hilarious set pieces that have made him one of the most popular writers of his generation. His other titles, The Accidental Woman, The Rotters' Club (winner of the Everyman Wodehouse prize), The House of Sleep (winner of the 1998 Prix Médicis Étranger), A Touch of Love, What a Carve Up! (winner of the 1995 John Llewellyn Rhys Prize) and The Rain Before it Falls, are all available in Penguin paperback.**

**Simply Effective CBT Supervision May 01 2021 CBT is the most widely endorsed Evidence Based Treatment (EBT) for psychological disorders. This innovative volume exclusively addresses CBT Supervision, which plays a vital role in the translation of CBT from an EBT to routine practise. Supervision requires a combination of knowledge and skill - the knowledge of the appropriate CBT protocol for the situation and the skill to equip the practitioner with the competencies to deliver these protocols in the context in which they are operating. In Simply Effective CBT Supervision, Michael J. Scott provides a unique guide to the particular skills necessary to monitor the fidelity and competence with which an EBT is implemented. There is an emphasis throughout on the importance of experiential learning, with detailed transcripts of supervisor-supervisee conversations, a focus on group supervision and the management of group processes. The power differential between supervisor and supervisee is acknowledged and addressed with guidelines and safeguards that will ensure that client needs can be addressed in a spirit of collaborative empiricism, and the text also covers the importance of matching the supervisor and supervisee. The book also incorporates downloadable worksheets for supervisor and supervisee. Covering the skills necessary to be an effective CBT supervisor, this is the ideal book for current and prospective CBT supervisors looking to extend their knowledge base.**

As Mr Jackson often reiterates, the logistics business has neither the time, inclination, nor sees a need to give any more than a very basic knowledge of what the new recruit should be doing. An assumption that a Satnav or the company guidance system is all they need he sees as being misguided and bad for business. On paper the business is simple. In reality it is not. **Global Mobile Satellite Communications Jul 23 2020** *Global mobile satellite communications (GMSC)* are specific satellite communication systems for maritime, land and aeronautical applications. It enables connections between moving objects such as ships, vehicles and aircrafts, and telecommunications subscribers through the medium of communications satellites, ground earth stations, PTT or other landline telecommunications providers. Mobile satellite communications and technology have been in use for over two decades. Its initial application is aimed at the maritime market for commercial and distress applications. In recent years, new developments and initiatives have resulted in land and aeronautical applications and the introduction of new satellite constellations in non-geostationary orbits such as Little and Big LEO configurations and hybrid satellite constellations as Ellipso Borealis and Concordia system. This book is important for modern shipping, truck, train and aeronautical societies because GMSC in the present millennium provides more effective business and trade, with emphasis on safety and commercial communications. *Global Mobile Satellite Communications* is written to make bridges between potential readers and current GMSC trends, mobile system concepts and network architecture using a simple mode of style with understandable technical information, characteristics, graphics, illustrations and mathematics equations. *Global Mobile Satellite Communications* represents telecommunications technique and technology, which can be useful for all technical staff on vessels at sea and rivers, on all types of land vehicles, on planes, on off shore constructions and for everyone possessing satellite communications handset phones.

**Sailing a Serious Ocean Jun 21 2020 "I know you'll want to read more after you finish Sailing a Serious Ocean. And be warned, you'll very likely want to sail with John, perhaps across an ocean." -- DALLAS MURPHY, AUTHOR OF ROUNDING THE HORN After sailing 300,000 miles and weathering dozens of storms in all the world's oceans, John Kretschmer has plenty of stories and advice to share. John's offshore training passages sell out a year in advance and his entertaining presentations are popular at boat shows and yacht clubs all over the English speaking world. John's talent for storytelling enchants his audience as it soaks up the lessons he learned during his oftenchallenging voyages. Now you can take a seat next to John--at a lesser cost--and get the knowledge you need to fulfill your own dream of blue-water adventure. In Sailing a Serious Ocean, John tells you what to expect when sailing the oceans and shows how to sail safely across them. His tales of storm encounters and other examples of extreme seamanship will help you prepare for your journey and give you confidence to handle any situation—even heavy weather. Through his personal stories, John will guide you through the whole process of choosing the right boat, outfitting with the right gear, planning your route, navigating the ocean, and understanding the nuances of life at sea. Our oceans are beautiful yet unpredictable—water that is at one moment a natural mirror for the glowing sun can turn into a foamy, raging wall of fury. John knows our oceans, and he is one of the best teachers of taming and enjoying them. Before you set off across the big blue, turn to John for his inspirational stories and hard-learned advice and discover the serious sailor in you.**

The purchaser is a company called Kuckelimat Baquecks Development Ltd and the plan is to turn the estate into a select golf club and spa. But is this development all what it seems? A campaign is launched to stop the development and William and Melissa find they are up against anonymous very rich investors from the murky world of offshore tax havens, tax evasion and money laundering. Can they beat the power of big money to save the endangered species and rare chalk grassland from the bulldozers?**

**Geoid Heights and Geodetic Positions of Pacific Harbors and Deep Sea Drilling Sites Nov 07 2021** A relatively simple double pass method is used to (A) reduce longitudinal spread of satellite navigation fixes and (b) obtain antenna height or sea level height on board a ship in a fixed harbor or fixed open-sea position (over an acoustic beacon). Required are the satellite navigator output or latitude, longitude, elevation angle, and path geometry for two consecutive passes (one east and one west of the site) of the same satellite. The standard deviation of one such double pass observation in a larger data set is usually below 20 m in both longitude and height. Improvements in the position accuracy of a site (as measured by  $\sigma$  sub m, the standard deviation of the mean or the 95% confidence interval) are obtained by restricting observations to passes: with a high number of symmetric Doppler counts, between given elevation angles, with a small number of iterations of the satellite navigator, and with eliminations of double pass results that are outside specified limits (usually 2  $\sigma$  sub m) in height and/or longitude. An accuracy  $\sigma$  sub m, of 10 m or less is usually achieved with four to five days of recordings.

**Location-Based Services Handbook Jan 29 2021** Location-Based Services Handbook: Applications, Technologies, and Security is a comprehensive reference containing all aspects of essential technical information on location-based services (LBS) technology. With broad coverage ranging from basic concepts to research-grade material, it presents a much-needed overview of technologies for positioning and localizing, including range- and proximity-based localization methods, and environment-based location estimation methods. Featuring valuable contributions from field experts around the world, this book addresses existing and future directions of LBS technology, exploring how it can be used to optimize resource allocation and improve cooperation in wireless networks. It is a

**self-contained, comprehensive resource that presents: A detailed description of the wireless location positioning technology used in LBS Coverage of the privacy and protection procedure for cellular networks—and its shortcomings An assessment of threats presented when location information is divulged to unauthorized parties Important IP Multimedia Subsystem and IMS-based presence service proposals The demand for navigation services is predicted to rise by a combined annual growth rate of more than 104 percent between 2008 and 2012, and many of these applications require efficient and highly scalable system architecture and system services to support dissemination of location-dependent resources and information to a large and growing number of mobile users. This book offers tools to aid in determining the optimal distance measurement system for a given situation by assessing factors including complexity, accuracy, and environment. It provides an extensive survey of existing literature and proposes a novel, widely applicable, and highly scalable architecture solution. Organized into three major sections—applications, technologies, and security—this material fully covers various location-based applications and the impact they will have on the future.**
