Administering the Colonizer Apr 19 2020 Harbin of the 1920s was viewed by Westerners as a world turned upside down. The Chinese government had taken over administration of the Russian-founded Chinese Eastern Railway concession, and its large Russian population. This account of the decade-long multi-ethnic and multinational administrative experiment in North Manchuria reveals that China not only created policies to promote Chinese sovereignty but also instituted measures to protect the Russian minority. This multi-faceted book is a historical examination of how an ethnic, cultural, and racial majority coexisted with a minority of a different culture and race. It restores to history the multiple national influences that have shaped northern China and Chinese nationalism.

Malaya's Secret Police 1945-60 Feb 22 2023 The Malayan Emergency lasted from 1948 to 1960. During these tumultuous years, following so soon after the Japanese surrender at the end of the Second World War, the whole country was once more turned upside down and the lives of the people changed. The war against the Communist Party of Malaya's determined efforts to overthrow the Malayan government involved the whole population in one form or another. Dr Comber analyses the pivotal role of the Malayan Police's Special Branch, the government's supreme intelligence agency, in defeating the communist uprising and safeguarding the security of the country. He shows for the first time how the Special Branch was organised and how it worked in providing the security forces with political and operational intelligence. His book represents a major contribution to our understanding of the Emergency and will be of great interest to all students of Malay(si)a's recent history as well as counter-guerrilla operations. It can profitably be mined, too, to see what lessons can be learned for counterinsurgency operations in other parts of the world.

Locking Up Our Own Jul 15 2022 Winner of the 2018 Pulitzer Prize for General Non-Fiction Longlisted for the National Book Award One of the New York Times Book Review's 10 Best Books of 2017 Former public defender James Forman, Jr. is a leading critic of mass incarceration and its disproportionate impact on people of colour. In *Locking Up Our Own*, he seeks to understand the war on crime that began in the 1970s and why it was supported by many African American leaders in the nation's urban centres. Forman shows us that the first substantial cohort of black mayors, judges and police chiefs took office amid a surge in crime and drug addiction. Many prominent black officials, including Washington, DC mayor Marion Barry and federal prosecutor Eric Holder, feared that the gains of the civil rights movement were being undermined by lawlessness - and thus embraced tough-on-crime measures, including longer sentences and aggressive police tactics. In the face of skyrocketing murder rates and the proliferation of open-air drug markets, they believed they had no choice. But the policies they adopted would have devastating consequences for residents of poor black neighbourhoods. A former public defender, Forman tells riveting stories of politicians, community activists, police officers, defendants and crime victims. He writes with compassion about individuals trapped in terrible dilemmas - from the men and women he represented in court to officials struggling to respond to a public safety emergency. *Locking Up Our Own* enriches our understanding of why American society became so punitive and offers important lessons to anyone concerned about the future of race and the criminal justice system.

The Special Constabulary Apr 12 2022 Special constables are warranted officers retained within British constabularies. Wearing similar uniforms, carrying the same personal protective equipment and holding identical powers to enforce the criminal law, special constables are to all intents and purposes indistinguishable from their colleagues in the regular police service. However, very little is documented about the experiences and motivations of special constables, the roles they play in contemporary policing or the impact that they have on the police organisation. This book draws together academics and practitioners to provide a valuable insight into historical, international and contemporary themes pertinent to the historical development and contemporary operation of the special constabulary. The book critically considers the origins of the special constabulary and the political, social and economic factors which led to its evolution over time. It compares and contrasts the organisation, functions and status of the special constabulary with other auxiliary forces, notably from the United States. The book also contributes to theoretical understanding of contemporary policing, to debates about the roles and operation of the 'mixed economy' of provision, and informs policy and practice in the United Kingdom and beyond.

Cop in the Hood Oct 26 2020 When Harvard-trained sociologist Peter Moskos left the classroom to become a cop in Baltimore's Eastern District, he was thrust deep into police culture and the ways of the street--the nerve-rattling patrols, the thriving drug corners, and a world of poverty and violence that outsiders never see. In *Cop in the Hood*, Moskos reveals the truths he learned on the midnight shift. Through Moskos's eyes, we see police academy graduates unprepared for the realities of the street, success measured by number of arrests, and the ultimate failure of the war on drugs. In addition to telling an explosive insider's story of what it is really like to be a police officer, he makes a passionate argument for drug legalization as the only realistic way to end drug violence--and let cops once again protect and serve. In a new afterword, Moskos describes the many benefits of foot patrol--or, as he calls it, "policing green."

Undercover Jun 14 2022 'Undercover lays bare the deceit, betrayal and cold-blooded violation practised again and again by undercover police officers - troubling, timely and brilliantly executed.' Henry Porter The gripping stories of a group of police spies - written by the award-winning investigative journalists who exposed the Mark Kennedy scandal - and the uncovering of forty years of state espionage. This was an undercover operation so secret that some of our most senior police officers had no idea it existed. The job of the clandestine unit was to monitor British 'subversives' - environmental activists, anti-racist groups, animal rights campaigners. Police stole the identities of dead people to create fake passports, driving licences and bank accounts. They then went deep undercover for years, inventing whole new lives so that they could live incognito among the people they were spying on. They used sex, intimate relationships and drugs to build their credibility. They betrayed friends, deceived lovers, even fathered children. And their operations continue today. Undercover reveals the truth about secret police operations - the emotional turmoil, the psychological challenges and the human cost of a lifetime of deception - and asks whether such tactics can ever be justified.

SWAT Sep 05 2021 A SWAT team is called in when criminal emergencies become too dangerous for regular police officers. Although most SWAT team members are police officers, they are trained in the use of powerful firearms and military tactics, and only used in very high-risk situations. The skills, equipment, training, and courage of these individuals are all discussed in this book, as well as how SWAT teams originated and have become one of our biggest defenses against terrorist attacks. This book will allow students to determine a central idea of a text and analyze its development over the course of the text, including its relationship to supporting ideas; provide an objective summary of the text.

Personal Data (Privacy) Law in Hong Kong A Practical Guide on Compliance (Second Edition) Jul 23 2020 The idea of a right to privacy, which arose in reaction to the rapid rise of newspapers, instant photography and the "paparazzi" of the 19th century, has evolved into a constitutional right in much of the developed world. It is enshrined in Hong Kong through Articles 28, 29, 30 and 39 of the Basic Law. Hong Kong stands proud as the first jurisdiction in Asia to enact legislation to safeguard personal data in the form of the Personal Data (Privacy) Ordinance, Cap 486 ("the Ordinance") which came into force in 1996. At its centre are the six Data Protection Principles based on the 1980 OECD Guidelines. The office of the Privacy Commissioner for Personal Data was created under this legislation to provide oversight and ensure compliance. The Octopus scandal in mid-2010 eventually led to substantial changes being made to the Ordinance that were enacted in 2012 and 2013, the main amendments being the Direct Marketing provisions and the provision of legal assistance and representation to aggrieved persons. In this digital age, the Ordinance is proving to be the main safeguard of our privacy rights. The Data Protection Principles seek to create broad common principles based on fairness that apply to the public and private sectors. The passage of twenty years since the enactment of the Ordinance has given rise to a substantial body of case law and administrative decisions on these principles and the other provisions of the Ordinance. The new amendments have already been the subject of judicial scrutiny. This publication, which replaces its predecessor, has the dual aim of becoming a practitioner's guide on the important subject of personal data privacy, containing, as it does, a detailed exposition of the principles and provisions in the Ordinance and a comprehensive source of reference materials, and of enabling the Privacy Commissioner to discharge his major duty to promote awareness and understanding of the Ordinance. The second edition includes not only a full discussion of these principles, but also summaries of all the seminal cases and Administrative Appeals Board rulings in this area, as well as a comprehensive list of all the pertinent cases.

Plural Policing Jan 09 2022 The police increasingly need to work with other government agencies, the third sector, community organisations and the private sector, an approach known as "Plural Policing". This book critically analyses the rise of this approach in England and Wales over the past decade, giving examples of national and international practice. Written by an author with experience in both practice and academia, it discusses the consequences of this approach for the historical model of policing provision and challenges views on how policing should be delivered in the future. Part of Key themes in policing, a textbook series designed to fill a growing need for research-informed policing within Higher Education curriculums and in practice, edited by Megan O'Neill, Marisa Silvestri & Stephen Tong, this accessible text, aimed primarily at undergraduate students, will appeal widely across different modules and tie into important issues covered on all policing courses.
