Ethics and Values in Social Work Nov 26 2020 Social work ethics provide practitioners with guidance on how to promote social work values such as respect, social justice, human relationships, service, competence, and integrity. Students entering the profession need to develop a real-world understanding of how to apply these values in practice while also managing the dilemmas that arise when social workers, clients, and others encounter conflicting values and ethical obligations. *Ethics and Values in Social Work* offers a comprehensive set of teaching and learning materials to help students develop the knowledge, self-awareness, and critical thinking skills required to handle values and ethical issues in all levels of practice--individual, family, group, organization, community, and social policy. BSW and MSW students will particularly appreciate how complex ethical obligations and theories have been translated into plain language. Additionally, the comprehensive set of case examples and exercises provides realistic scenarios to develop critical thinking and problem solving skills across a range of practice situations.

Laboratory Experiments in the Social Sciences Aug 04 2021 While there are many books available on statistical analysis of data from experiments, there is significantly less available on the design, development, and actual conduct of the experiments. *Laboratory Experiments in the Social Sciences* summarizes how to design and conduct scientifically sound experiments, be they from surveys,

interviews, observations, or experimental methods. The book encompasses how to collect reliable data, the appropriate uses of different methods, and how to avoid or resolve common problems in experimental research. Case study examples illustrate how multiple methods can be used to answer the same research questions and what kinds of outcome would result from each methodology. Sound data begins with effective data collection. This book will assist students and professionals alike in sociology, marketing, political science, anthropology, economics, and psychology. Provides a comprehensive summary of issues in social science experimentation, from ethics to design, management, and financing Offers "how-to" explanations of the problems and challenges faced by everyone involved in social science experiments Pays attention to both practical problems and to theoretical and philosophical arguments Defines commonalities and distinctions within and among experimental situations across the social sciences

Surveys and Experiments in Education Research May 13 2022

Problems with answers included.

Information Ethics in the Electronic Age Feb 27 2021 This collection of essays explores the ethical issues that arise when information technology seems to exceed and even contradict the purpose of its creators. The studies focus upon the management of information technology, specifically the Internet, considering the most ethical ways of generating, using, and controlling information technology in our time. Section One includes essays pertaining to Africa's place in the 21st century, including democracy, information flow, connections with the world through the Internet, telecommunications, Uganda and the digital divide, and an

examination of a pilot study in South Africa for developing a universal tool to measure information poverty. The essays of Section Two cover topical library issues, such as professional information organizations and their ethic codes, communicating ethics when teaching electronic research to undergraduates, pay-for-placement search engines, consumer health information services, laws applying to confidentiality of library records, privacy control after September 11, cybercrime investigation, and the technologies protecting copyright. The essays were originally presented at the “Ethics of Electronic Information in the 21st Century” symposium held at the University of Memphis on October 24-27, 2002. Each includes references and helpful Internet resources.

The Practice of Social Research Jan 21 2023 The Fourteenth Edition of Babbie's THE PRACTICE OF SOCIAL RESEARCH gives students the tools they need to apply research concepts practically, as both researchers and consumers. Known as the “gold standard” for research methods, the book offers a comprehensive, straightforward introduction to the field of research as practiced by social scientists. Babbie emphasizes the research process by showing students how to design and construct projects, introducing the various observation modes in use today, and answering questions about research methods-such as how to conduct online surveys and analyze both qualitative and quantitative data. IJER Vol 2-N1 Oct 18 2022 The mission of the International Journal of Educational Reform (IJER) is to keep readers up-to-date with worldwide developments in education reform by providing scholarly information and practical analysis from recognized international authorities. As the only peer-reviewed scholarly publication that combines authors’ voices without regard for the political affiliations perspectives, or research methodologies, IJER provides readers with

a balanced view of all sides of the political and educational mainstream. To this end, IJER includes, but is not limited to, inquiry based and opinion pieces on developments in such areas as policy, administration, curriculum, instruction, law, and research. IJER should thus be of interest to professional educators with decision-making roles and policymakers at all levels turn since it provides a broad-based conversation between and among policymakers, practitioners, and academicians about reform goals, objectives, and methods for success throughout the world. Readers can call on IJER to learn from an international group of reform implementers by discovering what they can do that has actually worked. IJER can also help readers to understand the pitfalls of current reforms in order to avoid making similar mistakes. Finally, it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the U.S. and the world.

Tearoom Trade Jul 15 2022 From the time of its first publication, 'Tearoom Trade' engendered controversy. It was also accorded an unusual amount of praise for a first book on a marginal, intentionally self-effacing population by a previously unknown sociologist. The book was quickly recognized as an important, imaginative, and useful contribution to our understanding of "deviant" sexual activity. Describing impersonal, anonymous sexual encounters in public restrooms—"tearooms" in the argot—the book explored the behavior of men whose closet homosexuality was kept from their families and neighbors. By posing as an initiate, the author was able to engage in systematic observation of homosexual acts in public settings, and later to develop a more complete picture of those involved by interviewing them in their homes, again without revealing their unwitting participation in his study. This enlarged edition of 'Tearoom Trade' includes the original text, together with a retrospect, written by Nicholas von Hoffman, Irving Louis Horowitz, Lee Rainwater, Donald P. Warwick, and Myron

Glazer. The material added includes a perspective on the social scientist at work and the ethical problems to which that work may give rise, along with debate by the book's initial critics and proponents. Humphreys added a postscript and his views on the opinion expressed in the retrospect.

Teaching Visual Methods in the Social Sciences Dec 16 2019

Teaching Visual Methods in the Social Sciences presents a practical and theoretical framework for those wanting to introduce visual methods into their curricula. Drawing on the expertise of contributors from across the social sciences, the book provides a comprehensive introduction to visual methodology, learning and teaching theory, and the ethical considerations involved. Divided into three parts, the book begins with an overview of how visual methods have been used in academic research, and how this can be applied to teaching and pedagogy. It then goes on to introduce different methods, including photography, film and drawing, describing how they can be used in various locations. Finally, the book pulls everything together, advocating the wider use of teaching visual methods in further and higher education curricula across the social science subjects. The book features a plethora of examples, as well as practical resources for FE and HE teachers, making it an essential companion for anyone interested in utilising visual methods in their teaching.

Ethics and Epidemiology Dec 20 2022 Written by epidemiologists, ethicists and legal scholars, this book provides an in-depth account of the moral problems that often confront epidemiologists, including both theoretical and practical issues. The first edition has sold almost three thousand copies since it was published in 1996. This edition is fully revised and includes three new chapters: Ethical Issues in Public Health Practice, Ethical Issues in Genetic Epidemiology, and Ethical Issues in International Health Research and Epidemiology. These chapters collectively address important developments of the past decade. Three chapters from the first

edition have also been reorganized: Ethical Optimized Study Designs in Epidemiology, Ethical Issues in Epidemiologic Research with Children, and The Ethics of Epidemiologic Research with Older Populations. Instead of standing alone, these chapters have been integrated into chapters on informed consent, confidentiality and privacy protection, and community-based intervention studies.

Basics of Research Methods for Criminal Justice and Criminology

Jan 09 2022 A concise, streamlined paperback that reflects the latest developments from the field, **BASICS OF RESEARCH METHODS FOR CRIMINAL JUSTICE AND CRIMINOLOGY**, Fourth Edition combines accessibility and a conversational writing style with Michael G. Research Methods for Criminal Justice and Criminology Aug 16 2022 Based on Earl Babbie's best-selling text, THE PRACTICE OF SOCIAL RESEARCH, this text combines the key strengths of Babbie's text (accessibility; a conversational, friendly writing style; and great examples) with Michael G. Maxfield's expertise in criminology and criminal justice for a text that addresses the specific methods used in criminal justice research. The new edition of this market-leader includes changes in its coverage of ethics, causation, validity, and research design, as well as updated coverage and statistics, and expanded examples, especially in the discussion of field research.

Ethical Dilemmas in International Criminological Research Aug 24 2020 Building on the editors' previous publication, Engaging

with *Ethics in International Criminological Research*, this new book brings together a fresh collection of leading international scholars tackling ethical dilemmas in criminological research. Contributors address how they have experienced and addressed ethical issues in their research, and how they have balanced the benefits and harms of doing such research for both the researcher and the researched. *Ethical Dilemmas in International Criminological Research* draws on various issues across a range of jurisdictions and political and social contexts, including cybercrime and transgressive online actions; state and police responses to crime; the war on drugs; working with traumatised participants in criminological research; punishment and prison; and sex, sexualities, and gender. Moreover, this collection aims to offer a truly international perspective, including insights from research projects in the Global South. This book is essential reading for junior scholars just starting out with original research, as well as more seasoned researchers looking to gain insights into the challenges of criminological research in other cultural contexts. It is also instructive reading for students taking courses in criminological and social research methods.

Managing Ethical Consumption in Tourism May 01 2021 Neither the tourism industry nor the tourist has responded convincingly to calls for more responsibility in tourism. Ethical consumption places pressure on travellers to manage a large number of decisions at a

time when hedonic motivations threaten to override other priorities. Unsurprisingly, tensions occur and compromises are made. This book offers new insight into the motivations that influence tourists and their decision-making. It explores how consumers navigate the responsible tourism market place and provide a rich understanding of the challenges facing those seeking to encourage travellers to become responsible. Not only will the book provide an improved interpretation of the complexity of ethical consumption in tourism, but it will also offer a variety of stakeholders a deeper understanding of: the key challenges facing stakeholders in the production and consumption of responsible tourism how ethical consumers can be influenced to consume ethically the gaps in consumer knowledge and how to broaden the appeal for individuals to make more informed ethical decisions how tour operators can respond to this emerging market by innovative product development how to design informative marketing communications to encourage a greater uptake for responsible holidays how destinations can tailor their products to the ethical consumer market how destination communities and management organisations can target responsible tourists through the provision of sustainable alternatives to mass-market holiday products. Written by leading academics from all over the world, this timely and important volume will be valuable reading for undergraduate and postgraduate students, researchers and academics interested in Tourism Ethics, Ethical Consumption and the global issue of Sustainability.

Citation Classics from the Journal of Business Ethics Feb 16 2020 The Journal of Business Ethics was founded by Alex C. Michalos and Deborah C. Poff and published its first issue in March 1982. It is the most frequently cited business ethics journal in the world. The Journal has always offered a multi-disciplinary and international public forum for the discussion of issues concerning the interaction of successful business and moral virtue. Its authors and readers are primarily scholars and students in social sciences

and philosophy , with special interests in the interaction of these disciplines with business or corporate responsibility. Since the field of business ethics grew simultaneously with the growth of the Journal, a collection of its most cited articles is tantamount to a collection of the articles that had the greatest influence in defining the field over its first 30 years of development. In this anniversary volume, an overview of citation classics from the Journal is presented, the 33 most frequently cited articles are reproduced and brief reflections on the impact of the Journal on the field are given from over 100 scholars who authored citation classics and/or distinguished papers, as well as those who served on the Editorial Board and/or are recognized as leaders in the field.

The Ethics of Social Research Jul 23 2020 Social scientists are unprepared for many of the ethical problems that arise in their research, and for criticisms of their ethics that seem to ignore such cherished scientific values as objectivity and freedom of inquiry. Yet, they possess method ological talent and insight into human nature that can be used to understand and resolve these problems. The contributors to this book demonstrate that criticism of the ethics of social research can stimulate constructive development of meth odology. Both volumes of The Ethics of Social Research were written for and by social scientists to show how ethical dilemmas arise in the day-to-day conduct of social research and how they can be resolved. The topics discussed in the companion volume include ethical problems that arise in experiments and sample surveys; this book deals with the ethical issues involved in fieldwork and in the regulation and publication of research. With candor and humor, many of the contributors describe lessons they have learned about themselves, their methods, and their research participants. Collectively, they illustrate that both humanists and determinists are likely to encounter ethical dilemmas in their research, albeit different ones, and that a blending of deterministic and humanistic approaches may be needed to solve these dilemmas. The aim of this

book is to assist investigators in preparing to meet some of the ethical problems that await the unwary. It offers perspectives, values, and guidelines for anticipating problems and devising solutions.

The Routledge Companion to Media Fandom Dec 08 2021 The field of fan studies has seen exponential growth in recent years and this companion brings together an internationally and interdisciplinarily diverse group of established scholars to reflect on the state of the field and to point to new research directions. Engaging an impressive array of media texts and formats and incorporating a variety of methodologies, this collection is organized into six main sections: methods and ethics, technologies and practices, identities, race and transcultural fandom, industry, and futures. Each section concludes with a conversation among some of the field's leading scholars and industry insiders to address a wealth of questions relevant to each section topic.

Planning Ethically Responsible Research Mar 31 2021 ""Two important aspects covered in this text are the ethical considerations in qualitative research methodologies, and the attention that is needed in University Research Ethics Committees to understanding and addressing these methodologies.""

The SAGE Handbook of Early Childhood Research Apr 19 2020 Recent decades have seen an upsurge of research with and about young children, their families and communities. The Handbook of Early Childhood Research will provide a landmark overview of the field of early childhood research and will set an agenda for early childhood research into the future. It includes 31 chapters provided by internationally recognized experts in early childhood research. The team of international contributors apply their expertise to conceptual and methodological issues in research and to relevant fields of practice and policy. The Handbook recognizes the main contexts of early childhood research: home and family contexts; out-of-home contexts such as services for young children and their

families; and broader societal contexts of that evoke risk for young children. The Handbook includes sections on: the field of early childhood research and its key contributions new theories and theoretical approaches in early childhood research collecting and analysing data applications of early childhood research This Handbook will become the valuable reference text for students, practitioners and researchers from across the social sciences and beyond who are engaged in research with young children.

Handbook of Disaster Research Sep 24 2020 This timely Handbook is based on the principle that disasters are social constructions and focuses on social science disaster research. It provides an interdisciplinary approach to disasters with theoretical, methodological, and practical applications. Attention is given to conceptual issues dealing with the concept "disaster" and to methodological issues relating to research on disasters. These include Geographic Information Systems as a useful research tool and its implications for future research. This seminal work is the first interdisciplinary collection of disaster research as it stands now while outlining how the field will continue to grow.

Criminological Theories Oct 26 2020 Designed for undergraduate criminology and criminological theory courses, *Criminological Theories: Understanding Crime in America, Second Edition* explores crime, crime theory, and various forms of criminal behavior within the United States. It focuses exclusively on theory, avoiding superfluous discussion of the criminal justice system. Students will come away from the text with plausible explanations of crime causation, a greater appreciation of criminological theory, and the ability to think critically about the social reality of crime. Current and highly relevant, the text includes coverage of new developments in the field of criminology, including cultural, integrative, life-course, and green criminological theories.

Political Pressures on Educational and Social Research Sep 17 2022 *Political Pressures on Educational and Social Research* draws

upon a variety of theoretical and methodological approaches to consider the problems that can arise when research findings diverge from political directions for policy. Chapters explore the impacts this can have on the researchers, as well as the influence it has on the research, including the methodology and the publication of results. The book offers innovative ways of seeing how these connect, overlap and interact, revealing particular issues of concern for researchers and evaluators in the context of research internationally. Key topics include the power and positioning of research, evidence based policy development, ethics and the importance of research that seeks to explore and discover knowledge. The book is divided into two sections. The first presents chapters from international academics, which provide a theoretical underpinning and discussion of power, policy, ethics and their influence on research resourcing, autonomy, purpose and methodology. The second section explores specific case studies and instances from the authors' own experiences in the field. This book offers an interesting and enlightening insight into the sometimes political nature of research and will appeal to researchers, evaluators and postgraduate students in the fields of education and the social sciences. It will be of particular interest to those studying research methods.

Introduction to Communication Jan 17 2020 This publication aims to introduce undergraduate students to the research practices of communication science, with the emphasis on fundamental and basic research.

Ethics and Moral Reasoning among Medical Laboratory Professionals Mar 19 2020 Physicians and patients have received inaccurate medical laboratory test results that have put patients at risk. The purpose of this study is to determine the moral reasoning level of medical laboratory professionals. The theoretical framework that guided this study is grounded by the theories of cognitive development. The study used a population survey and Defining

Issues Test, version 2 (DIT-2) questionnaires to collect data. Forty-seven participants from a medical laboratory were surveyed, and hypotheses were tested between moral reasoning scores (dependent variable) and age, gender, level of education, years of experience and job type (independent variables). Data were subjected to ANOVA and the results showed that laboratory professionals moral reasoning ($N=26.57$, $P=30.46$) was lower than that of other health care professionals. Training in ethics and moral reasoning are some of the recommendations made. Moral reasoning forms the basis for ethical behavior and good decision making; this is limited in people with poor moral reasoning score, which could result in incorrect laboratory results being reported to patients and physicians. Decisions made by medical laboratory professionals affect patients treatment and care.

Pathways in Ethics Nov 14 2019 "The public rationality of Christian faith is demonstrated in the way that Christian convictions make contributions to the contents and substance of intellectual, pluralistic public discourses on themes like economic justice and human rights. The impact of Christian faith for all walks of life, from the most intimate individual life to the most social, global and cosmic life, are dealt with in this great work of Public Theology from the African soil." - Prof Nico Koopman
