**Distributive Justice and World Trade Law** May 21 2020 This book proposes a novel theory of justice in international trade law, examining what justice means and demands in this domain.

The Public Order Exception in International Trade, Investment, Human Rights and Commercial Disputes Jun 21 2020 In the process of resolving disputes, it is not uncommon for parties to justify actions otherwise in breach of their obligations by invoking the need to protect some aspect of the elusive concept of public order. Until this thoroughly researched book, the criteria and factors against which international dispute bodies assess such claims have remained unclear. Now, by providing an in-depth comparative analysis of relevant jurisprudence under four distinct international dispute resolution systems – trade, investment, human rights and international commercial arbitration – the author of this invaluable book identifies common core benchmarks for the application of the public order exception. To achieve the broadest possible scope for her analysis, the author examines the public order exception's function, role and application within the following international dispute resolution systems: relevant World Trade Organization (WTO) agreements as enforced by the organization's Dispute Settlement Body and Appellate Body; international investment agreements as enforced by competent Arbitral Tribunals and Annulment Committees under the International Center for Settlement of Investment Disputes; provisions under the Inter-American Convention of Human Rights and the European Convention of Human Rights as enforced by the Inter-American Court of Human Rights and the European Court of Human Rights, respectively; and the New York Convention as enforced by national tribunals across the world. Controversies, tensions and pitfalls inherent in invoking the public order exception are elucidated, along with clear guidelines on how arguments may be crafted in order to enhance prospects of success. Throughout, tables and graphs systematize key aspects of the relevant jurisprudence under each of the dispute resolution systems analysed. As an immediate practical resource for lawyers on any side of a dispute who wish to invoke or strengthen a public order exception claim, the book's systematic analysis will be welcomed by lawyers active in WTO disputes, international investment arbitration, human rights law or enforcement of foreign arbitral awards. Academics and policymakers will find a signal contribution to the ongoing debate on the existence, legal basis, content and functions of the transnational public order.

**Rebel Streets and the Informal Economy** Feb 16 2020 Street trade is a critical and highly visible component of the informal economy, linked to global systems of exchange. Yet policy responses are dismissive and evictions commonplace. Despite being progressively marginalised from public space, street traders in the global south are engaged in spatial and political battlegrounds to reclaim space, and claim de facto property rights over their place of work, through quiet infiltration, union power, or direct action. This book explores 'rebel streets', the challenges faced by informal economy actors and how organised groups are seeking to reframe legal understandings to create new claims to space and urban rights. The book sets out new thinking and a conceptual framework for improved understanding of the plural relationship between law, rights, and space for the informal economy, the contest between traditional, modernist and rights-based approaches to development, and impacts on the urban working poor. With a focus on street trading, the book seeks to reframe the legal context in which modern informal economies operate, drawing on key areas of academic inquiry and case studies of how vendors are staking claim to urban rights. The book argues for a reconceptualisation of legal instruments to provide a rights-based framework for urban work that recognises the legitimacy of urban informal economies, the scope for collective management of urban resources, and the social value of public space as a site for urban livelihoods. It will be of interest to students and scholars of geography, economics, urban studies, development studies, political studies and law.

**Schmitthoff** Jan 21 2023 This reference work, now in its 11th edition, covers the complex area of international export trade law. Carole Murray has rationalized the chapter content of previous editions and brought the text up-to-date.

*Going the Distance* Jul 03 2021 "Long-distance oceanic and overland trade along the Eurasian landmass in the 1400s was largely dominated by Chinese, Indian, and Arabic traders and predominantly conducted over short trajectories by sole traders or organized around small-scale enterprises. Yet, within two centuries of Europeans' arrival in the Indian Ocean in 1498, long-distance trade throughout Eurasia was mainly taken over by them. By 1700, they had formed new, large-scale, and impersonal organizations, primarily a joint-stock business corporation between English East India Company (EIC) and Dutch East India Company (VOC). This allowed them to transform trade from an enterprise dominated by many small traders moving goods over short segments to a vertically integrated firm that was able to control goods from their origin to the end consumers. This rise of the business corporation proved essential for the economic rise of Europe. Why did the corporation arise indigenously only in Europe, and given its effective organization of long-distance trade, why wasn't it mimicked by other Eurasian civilizations for 300 years? Harris closely examines the role played by forms of organization in the transformation of Eurasian trade between 1400 and 1700, comparing the organizational forms that were used in four major civilizations: Chinese, Indian, Middle Eastern, and Western European. Through this comparative perspective, he argues that the organizational design of the EIC and VOC, the first long-lasting joint-stock corporations, enabled large-scale multilateral impersonal cooperation for the first time in human history. He also argues that this new organizational form enabled the English and Dutch to deploy more capital, more ships, more voyages, and more agents than other organizational forms"--

**The Law of Trade Secrets** Dec 28 2020

**Principles of International Trade Law** Oct 26 2020 Softbound - New, softbound print book.

**Law of International Trade** Feb 22 2023 Presenting a comprehensive treatment of all key aspects of private international trade law, this book demonstrates to the reader how international trade law operates in its political, economic and business contexts.

*Principles of Law Relating to International Trade* Feb 27 2021 The law of international trade raises questions of great intellectual depth. In *Principles of Law Relating to International Trade*, the author draws from his practical and teaching experience to give a comprehensive introduction to the key areas of law that apply in international business. For the benefit of readers unfamiliar with the English legal system and the many associated branches of English civil law, the book includes a brief introduction to, among other topics, constitutional, criminal, and employment law. The branches of law directly related to international trade, such as contract, insurance, competition, carriage of goods, and sale of goods, are concisely covered in the main text. Case studies and examples are used to clarify the issues for the non-specialist, making international trade law accessible to those taking professional examinations in this field, as well as business executives. The extensive use of footnotes and inclusion of case commentaries bring into clearer focus the many facets of this complicated subject and would be of benefit to the international trade law specialist.

**Dean's Law of Trade Secrets and Privacy** Sep 17 2022 Law of Trade Secrets and Privacy Third Edition provides essential guidance through the law regarding personal, institutional and corporate privacy. This long-awaited new edition assists readers to better protect commercially sensitive, and private and personal information, by understanding the underlying principles of two related and rapidly changing areas of law. Protection of trade secrets is an integral part of business development. Similarly, protection of personal information is becoming increasingly complex under expanding privacy regulation. This book addresses the obligations in both areas, including the overlap. Constantly-evolving technology creates risk for businesses and individuals, yet legal regulatory frameworks may be slow to respond, and lag behind developments. A practitioner or company with a clear grasp of relevant legal principles and practice is better equipped to develop strategies for safeguarding against breaches of confidence. Since the Second Edition published in 2002, the challenges to personal, institutional and corporate privacy have become much more complex. Compliance with confidentiality laws is now complicated by jurisdictional issues arising from the use of modern communication technology, including social media. In addition, fiduciary relationships add another level of complication. In response, employment contracts and business restraints are becoming more prevalent. Privacy legislation has continued to evolve and it is necessary for practitioners to be familiar with Commonwealth, State and Territory privacy and health records regulation. The Privacy Act itself has recently undergone major amendments, and more are anticipated. At the same time, statutory protection is further complicated by the possible emergence of a common law right to privacy. Practitioners must move quickly in response to these developments and to anticipate how the courts will interpret them. Law of Trade Secrets and Privacy Third Edition is extracted from the subscription service Trade Secrets and Privacy, maintained by privacy and data protection specialist

lawyer, Gordon Hughes . It is an essential and affordable resource for every company, institution and individual with privacy concerns.

*International Trade & Business Law & Policy* Jan 29 2021 A sourcebook for students and practitioners who are interested in international business transactions and want to gain familiarity with the law and practice of international trade law, policies and ethics. Each chapter deals with an important aspect of international trade and business.

*International Trade and Business Law Review* Mar 19 2020

*The Law of Trade Secrets and Personal Secrets* Nov 26 2020 The second edition of THE LAW OF TRADE SECRETS has been updated to provide new cases and commentary in the complex area of trade secrets. It discusses and analyses issues such as employee inventors, duties arising from a fiduciary relationship and economic torts and information secrets. The book contains new material that looks at the development of equity in protecting privacy and the law of personal secrets. It includes a new chapter examining the impact of FOI regimes in relation to trade secrets, a growing area of concern for practitioners. Readers will find that the text builds on the strength of the first edition to result in a highly useful text that they will turn to in dealing with complex trade secret issues.

**Restructuring Trade Agreements** Jun 02 2021 To avoid trade-bargain erosion, countries involved in large-scale, bilateral or regional trade arrangements must reconcile preserving close economic ties and supply chains with the need to dynamically adjust to new opportunities with other partners. Using the growing deterioration of the European Union-Turkey Customs Union as an illustration to a new model of trade-agreement restructuring, this well-researched and deeply insightful book outlines and demonstrates how this trade arrangement can be successfully renegotiated, thus providing expert practical guidance in a crucial area of trade law and policy that rarely receives the attention it deserves. The book's novel framework features a clearly articulated legal foundation, a transactional deployment strategy, and a sequential negotiating approach applicable to bilateral and regional trade arrangements whose original terms no longer reflect the changed capabilities and interests of at least one of its parties. The authors respond in detail to questions, such as: When should a country pursue bargain rebalancing? How should trade diplomats pursue renegotiation and/or new partnerships, legally and transactionally? Given that free trade agreements keep each country's trade sovereignty mostly intact, under which circumstances should a country ever consider entering a customs union? How may free-trade agreements help countries address trade imbalances while enhancing supply chain resilience? What are the limits to WTO litigation as an effective market-barrier-opening tool? How should trade-agreement restructuring be deployed as a path to further trade liberalization? In-depth attention is paid to identifying and investigating trade arrangements that are ripe for renegotiation and assessing sources of domestic and external support for or against renegotiating such bargains. This book's model of international trade-agreement restructuring fits well with emerging thinking on greater trade diversification and supply-chain resilience. The authors provide a clear, actionable approach for considering and conducting the renegotiation of trade deals. For these reasons, this book will be welcomed by trade lawyers, supply-chain executives, economists, government officials, and academics who are grappling with rising economic frictions in the fault lines of national sovereignty, economic interdependence, and the limits of current trade arrangements.

*Legal and Economic Principles of World Trade Law* Mar 31 2021 The World Trade Organization (WTO) Agreement covers the vast majority of international commerce in goods and services. The Agreement covers not only measures that directly affect trade, such as import tariffs and import quotas, but potentially almost any type of internal measure with an impact on trade. Thus WTO legal texts are by necessity expressed in vague terms, and in need of continuous interpretation. The overarching aim of the project *Legal and Economic Principles of World Trade Law*, led by the American Law Institute, is to contribute to the analysis of WTO law in not only law but also economics. This volume reports work done thus far to identify improvements to the interpretation of the Agreement. It starts with two background studies, the first of which summarizes the study *The Genesis of the GATT*, published by Cambridge University Press in 2008, which highlights the negotiating history of what became the GATT 1947-1948; the second study, coauthored by Gene M. Grossman and Henrik Horn, is an introduction to the economics of trade agreements. These are followed by two main studies. The first, authored by Kyle Bagwell, Robert W. Staiger, and Alan O. Sykes, discusses legal and economic aspects of the GATT regulation of border policy instruments, such as import tariffs and import quotas. The second, written by Gene M. Grossman, Henrik Horn, and Petros C. Mavroidis, focuses on the core provision for the regulation of domestic policy instruments - the National Treatment principles in Art. III GATT.

**Sugar and the Making of International Trade Law** Oct 06 2021 "Comparative law is increasingly used as a tool in the making of law at national, regional and international levels. Private international law is now often affected by international conventions, and the issues faced by classical conflicts rules are frequently dealt with by substantive harmonisation of law under international auspices"--

*Trade Finance* Sep 24 2020 Trade Finance provides a much-needed re-examination of the relevant legal principles and a study of the challenges posed to current legal structures by technological changes, financial innovation, and international regulation. Arising out of the papers presented at the symposium, *Trade Finance for the 21st Century*, this collection brings together the perspectives of scholars and practitioners from around the globe focusing on core themes, such as reform and the future role of the UCP, the impact of technology on letters of credit and other forms of trade finance, and the rise of alternative forms of financing. The book covers three key fields of trade finance, starting with the challenges to traditional trade financing by means of documentary credit. These include issues related to contractual enforceability, the use of "soft clauses", the doctrine of strict compliance, the fraud exception, the role of the correspondent bank, performance bonds, and conflict of laws problems. The second main area covered by the work is the technological issues and opportunities in trade finance, including electronic bills of exchange, blockchain, and electronically transferable records. The final part of the work considers alternative and complementary trade finance mechanisms such as open account trading, supply-chain financing, the bank payment obligation, and countertrade.

**The Law and Policy of the World Trade Organization** Jul 15 2022 This is primarily a textbook for graduate and upper-level undergraduate students of law. However, practising lawyers and policy-makers who are looking for an introduction to WTO law will also find it invaluable. The book covers both the institutional and substantive law of the WTO. While the treatment of the law is often quite detailed, the main aim of this textbook is to make clear the basic principles and underlying logic of WTO law and the world trading system. Each section contains questions and assignments, to allow students to assess their understanding and develop useful practical skills. At the end of each chapter there is a helpful summary, as well as an exercise on specific, true-to-life international trade problems.

*Principles of International Trade and Investment Law* Apr 12 2022 This essential book discusses a wide range of important legal principles such as procedural fairness and reasonableness in the context of international trade and investment law. Using comparative methodology, the authors examine how those principles are reflected in treaties and how they are employed by adjudicators resolving disputes.

*EU Trade Law* Aug 24 2020 This comprehensive book provides a thorough analytical overview of the European Union's existing law and policy in the field of international trade. Considering the history and context of the law's evolution, it offers an adept examination of its common commercial policy competence through the years, starting with the Treaty of Rome up until the Treaty of Lisbon, as a background for understanding the EU's present role in the World Trade Organization (WTO) framework.

*International Trade Law* Oct 14 2019 Written by a team of leading scholar/practitioners including a former Appellate Body member, PhD economist and former WTO Secretariat Lawyer, *International Trade Law* covers all aspects of WTO law. Appropriate for a two- to three-hour international trade course, the third edition covers trade in goods, services, and intellectual property, in 22 succinct chapters of around 30 pages, carefully excerpting leading cases, providing basic introductions, probing questions and real life problems. This book balances positive and normative perspectives, mixing legal texts and panel/Appellate Body decisions with analysis of economic and policy challenges faced by the international trading system. The Third Edition has been updated to include recent political and economic events, issues and policy debates, and supplements new developments in case law with additional questions and a revised Teacher's Manual. Hallmark features of *International Trade Law*: • Prepared by three leading WTO scholars – providing a balanced international and methodological perspective • Up-to-date, discriminating case selection presents both classic cases and recent doctrine • Contextualizes international trade issues with insights into key economic factors at work • Key WTO cases are edited and presented to illustrate and teach central concepts and doctrine • Illuminating introductory and explanatory material throughout • Helpful summaries of key teaching points are included in each chapter • Well-crafted questions stimulate class discussion on policy issues • Manageable length for two- and three-credit courses • Adaptable to graduate-level courses in international trade • Comprehensive Teachers Manual with answers to questions as well as teaching suggestions, tips, and supplementary material appropriate for class discussion • Complemented by a thorough and up-to-date documents supplement The Third Edition has been revised to include: • Third author added: Jennifer Hillman, former member of the WTO Appellate Body and the US International Trade Commission, now Professor at Georgetown Law • Major revision of trade remedy chapters (dumping, subsidies, safeguards) with new hands-on practical problems • Completely revised chapter on technical barriers to trade (TBT) taking account of new jurisprudence post-2012 (US – Clove Cigarettes, US - Tuna II, US – COOL, EC – Seal) • New text on post-2008 trade collapse, global value chains • Updated statistics on WTO dispute settlement, free trade agreements, developing countries • Discussion of 2015 US Trade Promotion Authority, mega-regionals including TPP and TTIP, 2014 Trade Facilitation Agreement • Includes summaries of new, major cases such as Canada – Feed-in Tariff, EC – Seal, Peru – Agricultural Products, China – Rare Earths

**African Regional Trade Agreements as Legal Regimes** May 01 2021 African regional trade integration has grown exponentially in the last decade. This book is the first comprehensive analysis of the legal framework within which it is being pursued. It will fill a huge knowledge gap and serve as an invaluable teaching and research tool for policy makers in the public and private sectors, teachers, researchers and students of African trade and beyond. The author argues that African Regional Trade Agreements (RTAs) are best understood as flexible legal regimes particularly given their commitment to variable geometry and multiple memberships. He analyzes the progress made toward trade liberalization in each region, how the RTAs are financed, their trade remedy and judicial regimes, and how well they measure up to Article XXIV of GATT. The book also covers monetary unions as well as intra-African regional integration, and examines free trade agreements with non-African regions including the Economic Partnership Agreements with the European Union.

**Animal Welfare and International Trade Law** Feb 10 2022 This thought-provoking book examines the rise of animal welfare as a serious policy concern in the

international trade law regime. The central focus is an in-depth study of the background and legal analysis of the landmark EC – Seal Products case, which confirmed the importance of animal welfare in WTO law. The book explores how the WTO handled the relationship between trade disciplines and animal welfare, including the particularly challenging questions around Indigenous seal hunting rights. It offers a detailed account of animal welfare and animal conservation commitments in new trade agreements, as well as mechanisms for enforcement, cooperation, and citizen participation.

**International Trade Law** Mar 11 2022 This book covers the fundamentals of international trade law. In this respect, each key pillar of the discipline is unpacked in 10 self-contained chapters that will help readers understand and navigate the legal aspects of international trade and guide them through the aims and historical development of both intergovernmental and private systems of cross-border trading rules and institutions.

**Trade and Environmental Law** Aug 04 2021 This extensive volume of the Elgar Encyclopedia of Environmental Law probes the essential concepts, contemporary research, and key elements of law at the intersection of international trade and international environmental law. Its succinct, structured entries provide a definitive and comprehensive assessment of the interactions between these fields, written by internationally renowned and recognized experts.

**China's Influence on Non-Trade Concerns in International Economic Law** Jul 23 2020 This volume examines the range of Non-Trade Concerns (NTCs) that may conflict with international economic rules and proposes ways to protect them within international law and international economic law. Globalization without local concerns can endanger relevant issues such as good governance, human rights, right to water, right to food, social, economic, cultural and environmental rights, labor rights, access to knowledge, public health, social welfare, consumer interests and animal welfare, climate change, energy, environmental protection and sustainable development, product safety, food safety and security. Focusing on China, the book shows the current trends of Chinese law and policy towards international standards. The authors argue that China can play a leading role in this context: not only has China adopted several reforms and new regulations to address NTCs; but it has started to play a very relevant role in international negotiations on NTCs such as climate change, energy, and culture, among others. While China is still considered a developing country, in particular from the NTCs' point of view, it promises to be a key actor in international law in general and, more specifically, in international economic law in this respect. This volume assesses, taking into consideration its special context, China's behavior internally and externally to understand its role and influence in shaping NTCs in the context of international economic law.

**Energy in International Trade Law** Dec 20 2022 A study of energy regulation in international trade law against the backdrop of energy markets that have undergone radical change.

**The Oxford Handbook of International Trade Law** Jan 09 2022 This book examines international trade law and its intersection with states and other aspects of the international system. It covers the economic and institutional context of the world trading system, substantive law of the WTO, dispute settlement, and the interaction between trade and other disciplines in international law.

*The World Trade Organization* Sep 05 2021 Includes bibliographical references and index.

**Big Data and Global Trade Law** May 13 2022 This collection explores the relevance of global trade law for data, big data and cross-border data flows. Contributing authors from different disciplines including law, economics and political science analyze developments at the World Trade Organization and in preferential trade venues by asking what future-oriented models for data governance are available and viable in the area of trade law and policy. The collection paints the broad picture of the interaction between digital technologies and trade regulation as well as provides in-depth analyses of critical to the data-driven economy issues, such as privacy and AI, and different countries' perspectives. This title is also available as Open Access on Cambridge Core.

**Consent and Trade** Nov 14 2019 A new take on trade law's roots in consensual exchange, illuminating coercive and exploitative dynamics undercutting both consent and trade.

**Law and Development Perspective on International Trade Law** Nov 19 2022 Economic development is the most important agenda in the international trading system today, as demonstrated by the Doha Development Agenda (DDA) adopted in the current multilateral trade negotiations of the World Trade Organization (the Doha Round). This book provides a relevant discussion of major international trade law issues from the perspective of development in the following areas: general issues on international trade law and economic development; and specific law and development issues in World Trade Organization, Free Trade Agreement and regional initiatives. This book offers an unparalleled breadth of coverage on the topic and diversity of authorship, as seventeen leading scholars contribute chapters from nine major developed and developing countries, including the United States, Canada, Japan, China (including Hong Kong), South Korea, Australia, Singapore and Israel.

**Basic Documents on International Trade Law** Dec 16 2019

**Legal Aspects of Trade Finance** Oct 18 2022 Trade finance is of great importance in the commercial world, for both students (undergraduate and postgraduate) and practitioners. The choice of countries in export trade is often perception-based: trade with government departments or public institutions is seen as much safer than with private entities and the choice of countries is often based on that perception of risk. This book: addresses issues and topics which are relevant to all jurisdictions in the world explains the various types of trade finance, how they may be raised and the legal issues pertaining to them Value for those wanting to understand the legal issues of sources of trade finance in both the developed and developing countries, this book will interest students studying the interaction between law and commerce.

**Digital Services in International Trade Law** Jun 14 2022 The first comprehensive analysis of the applicability of international trade law to digital services at multilateral and regional levels.

*International Trade Law* Aug 16 2022 "International Trade Law offers comprehensive analysis of international sale transactions through case law, policy documents, legislation, international conventions and rules adopted by international organisations such as the ICC."--

**Global Trade, Labour Rights and International Law** Jan 17 2020 This book provides a set of proposals for how best to guarantee effective enforcement of labour rights worldwide. The linkage between labour standards and global trade has been recurrent for some 200 years. At a time when the world is struggling to find a way out of crisis and is striving for economic growth, more than ever there is a need for up-to-date research on how to protect and promote labour rights in the global economy. This book explores the history of the field and also provides an overview of emerging trends and opportunities. It discusses the most recent problems including: the effectiveness and the role of the International Labour Organization (ILO) in the second century of its existence, the World Trade Organization (WTO) and its potential relevance in the protection of labour rights, the effectiveness of the US and the EU Generalised System of Preferences, the impact of corporate social responsibility (CSR) instruments on labour rights, and labour provisions in the international trade agreements concluded by the US and the EU. The book argues, inter alia, that trade agreements seem to be a useful tool to help pave the way out of the crisis and that the United States–Mexico–Canada Agreement (USMCA) can be perceived as a model agreement and a symbol of a shift in perspective from long global supply chains to a focus on regional ones, local production, jobs and a rise in wages. The book will be essential reading for academics and students in the fields of human rights law, international labour law, industrial relations law, international sustainable development law, international economic law and international trade law. It will also be of interest to practitioners, non-government organisations (NGOs) and policy makers.

**World Trade and Investment Law Reimagined** Nov 07 2021 World trade and investment law is in crisis: new and progressive ideas are needed. Rules that facilitated globalization and supported global economic growth are being challenged. A system of global governance that once seemed secure is now at risk as the United States ignores the rules while developing countries struggle to escape restrictions. Some want to tear global institutions and agreements down while others try desperately to maintain the status quo. Rejecting both options, a group of trade and investment law experts from 10 countries, South and North, have joined hands to propose ideas for a new world trade and investment law that would maintain global growth while distributing costs and benefits more fairly. Paying special attention to those who have suffered from trade dislocation and to restrictions that have hampered innovative growth strategies in developing countries, they outline a progressive trade and investment law agenda in World Trade and Investment Law Reimagined.

**The WTO and International Trade Law/dispute Settlement** Apr 19 2020 The system of dispute resolution within the WTO and its evolution over time have attracted the attention of numerous scholars. This volume brings together a selection of papers by prominent scholars working in a range of disciplines. The collection is divided into six parts. The first addresses broad questions about the scope and function of the dispute resolution system. Part II considers the relationship between the dispute system and national authorities, while part III focuses more narrowly on the remedies for breach of legal obligations in the WTO system. Part IV examines litigation and settlement questions. Part V considers the pre-WTO environment and the role of unilateralism in the enforcement of commitments under GATT. The final section looks at broader systemic issues. This insightful volume will be an essential source of reference for students and practitioners alike. 25 articles, dating from 1992 to 2003

*International Trade Law* Dec 08 2021 Collates materials covering a wide spectrum of legal issues associated with international trade and investment and provides a sufficient resource both for ideas and issues.
