This publication shares with parents everything they'll need to know to help their child be successful from Day One. Based on the latest research, this booklet also includes a section on how communities can make kindergarten more ready for today's children. How lessons from kindergarten can help everyone develop the creative thinking skills needed to thrive

in today's society. In kindergartens these days, children spend more time with math worksheets and phonics flashcards than building blocks and finger paint. Kindergarten is becoming more like the rest of school. In *Lifelong Kindergarten*, learning expert Mitchel Resnick argues for exactly the opposite: the rest of school (even the rest of life) should be more like kindergarten. To thrive in today's fast-changing world, people of all ages must learn to think and act creatively—and the best way to do that is by focusing more on imagining, creating, playing, sharing, and reflecting, just as children do in traditional kindergartens. Drawing on experiences from more than thirty years at MIT's Media Lab, Resnick discusses new technologies and strategies for engaging young people in creative learning experiences. He tells stories of how children are programming their own games, stories, and inventions (for example, a diary security system, created by a twelve-year-old girl), and

collaborating through remixing, crowdsourcing, and large-scale group projects (such as a Halloween-themed game called *Night at Dreary Castle*, produced by more than twenty kids scattered around the world). By providing young people with opportunities to work on projects, based on their passions, in collaboration with peers, in a playful spirit, we can help them prepare for a world where creative thinking is more important than ever before. *Miss Bindergarten*, the Kindergarten teacher, organizes her classroom, stacking the shelves and hanging the charts, in preparation for the exciting upcoming first day of school. Reprint. This rhyming, brightly illustrated book is the perfect way to practice the alphabet and to introduce young children to kindergarten. It's the first day of kindergarten and Miss Bindergarten is hard at work getting the classroom ready for her twenty-six new students.
