Manuals Combined: U.S. Marine Corps Basic Reconnaissance Course (BRC) References Jun 30 2021
Over 5,300 total pages ... MARINE RECON
Reconnaissance units are the commander's eyes and ears on the battlefield. They are task organized as a

highly trained six man team capable of conducting specific missions behind enemy lines. Employed as part of the Marine Air-Ground Task Force, reconnaissance teams provide timely information to the supported commander to shape and influence the battlefield. The varying types of missions a Reconnaissance team conduct depends on how deep in the battle space they are operating. Division Reconnaissance units support the close and distant battlespace, while Force Reconnaissance units conduct deep reconnaissance in support of a landing force. Common missions include, but are not limited to: Plan, coordinate, and conduct amphibious-ground reconnaissance and surveillance to observe, identify, and report enemy activity, and collect other information of military significance. Conduct specialized surveying to include: underwater reconnaissance and/or demolitions, beach permeability and topography, routes, bridges, structures, urban/rural areas, helicopter landing zones (LZ), parachute drop zones (DZ), aircraft forward operating sites, and mechanized reconnaissance missions. When properly task organized with other forces, equipment or personnel, assist in specialized engineer, radio, and other special reconnaissance missions. Infiltrate mission areas by necessary means to include: surface, subsurface and airborne operations. Conduct Initial Terminal Guidance (ITG) for helicopters, landing craft, parachutists, air-delivery, and re-supply. Designate and engage selected targets with organic weapons and force fires to support battlespace shaping. This includes designation and terminal guidance of precision-guided munitions. Conduct post-strike reconnaissance to determine and report battle damage assessment on a specified target or area. Conduct limited scale raids

and ambushes. Just a SAMPLE of the included publications: BASIC RECONNAISSANCE COURSE PREPARATION GUIDE RECONNAISSANCE (RECON) TRAINING AND READINESS (T&R) MANUAL RECONNAISSANCE REPORTS GUIDE GROUND RECONNAISSANCE OPERATIONS GROUND COMBAT OPERATIONS Supporting Arms Observer, Spotter and Controller DEEP AIR SUPPORT SCOUTING AND PATROLLING Civil Affairs Tactics, Techniques, and Procedures MAGTF Intelligence Production and Analysis Counterintelligence Close Air Support Military Operations on Urbanized Terrain (MOUT) Convoy Operations Handbook TRAINING SUPPORT PACKAGE FOR: CONVOY SURVIVABILITY Convoy Operations Battle Book Tactics, Techniques, and Procedures for Training, Planning and Executing Convoy Operations Urban Attacks

Technical Report Nov 11 2019

Rotorcraft Flying Handbook Apr 09 2022 Designed by the Federal Aviation Administration, this handbook is the ultimate technical manual for anyone who flies or wants to learn to fly a helicopter or gyroplane. If you're preparing for private, commercial, or flight instruction

pilot certificates, it's more than essential reading: it's the best possible study guide available, and its information can be life saving. In authoritative and understandable language, here are explanations of general aerodynamics and the aerodynamics of flight, navigation, communication, flight controls, flight maneuvers, emergencies, engines, night operations, and much more. With full-color illustrations detailing every chapter, this is a one-of-a-kind resource for pilots and would-be pilots.

Seabee Combat Handbook, Volume 2, Training Manual (Traman), March 1996 Sep 14 2022

Department of the Army Pamphlet Apr 28 2021

Precision-guided Weapons Sep 21 2020 The first part of this paper discusses enough about the mechanics of these weapons to give the reader a feel for how they work and provide brief descriptions of some of the more important weapons associated with non-nuclear land combat. The brief treatment here mentions only a fraction of current PGM developments; it is characteristic of the pace of development that dozens of new PGM types in many countries reach operational testing each year. The second part of the paper focusses on a number of important and so far unresolved implications of the new weapons; it discusses their likely effects on force posture and on the conduct of warfare. For example, what is their effect on the relative usefulness of the advanced tank, the complex fighter-bomber, and the big aircraft carrier. What will be the consequences for the organization of land forces, and for their tactics.
