NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you’ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day. The study of the Armenian system of notation called Khazs (Neumes) is of significance both for Armenian and Byzantine music from a historical and aesthetic point of view. Over the centuries the Armenian people have created a musical culture which is largely inaccessible because of the fact that to this day the medieval notation of this music has not been deciphered. Prof. R.A. At'ayan's unique study based on the abundant manuscript sources of the Institute of Ancient Manuscripts (Erevan) not only traces the origin and development of this notation system convincingly, but also re-creates the tunes of the numerous chants and songs composed over the centuries. Scholars and enthusiasts of western American history have praised Elliott West as a distinguished historian and an accomplished writer, and this book proves them right on both counts. Capitalizing on West's wide array of interests, this collection of his essays touches on topics ranging from viruses and the telegraph to children, bison, and Larry McMurry. Drawing from the past three centuries, West weaves the western story into that of the nation and the world beyond, from Kansas and Montana to Haiti, Africa, and the court of Louis XV. Divided into three sections, the volume begins with conquest. West is not the first historian to write about Lewis and Clark, but he is the first to contrast their expedition with Mungo Park's contemporaneous journey in Africa. "The Lewis and Clark expedition," West begins, "is one of the most overrated events in American history—and one of the most revealing." The humor of this insightful essay is a chief characteristic of the whole book, which comprises ten chapters previously published in major journals and magazines—but revised for this edition—and four brand-new ones. West is well known for his writings about frontier family life, especially the experiences of children at work and play. Fans of his earlier books on these subjects will not be disappointed. In a final section, he looks at the

West of myth and imagination, in part to show that our fantasies about the West are worth studying precisely because they have been so at odds with the real West. In essays on buffalo, Jesse James and the McMurtry novel *Lonesome Dove*, West directs his formidable powers to subjects that continue to shape our understanding—and often our misunderstanding—of the American West, past and present. *Essential Code and Commands Java Phrasebook* gives you the code phrases you need to quickly and effectively complete your programming projects in Java. *Concise and Accessible Easy to carry and easy to use*—lets you ditch all those bulky books for one portable guide *Flexible and Functional Packed* with more than 100 customizable code snippets—so you can readily code functional Java in just about any situation Timothy Fisher has been working professionally in the Java software development field since 1997 and is currently a consultant for the Compuware Corporation in Detroit, Michigan. He enjoys writing about technology and has been a contributor to *Java Developer's Journal* and *XML Journal*. Tim is also passionate about education and the use of advanced Internet technologies for education. *Programming / Java In 2* Timothy, we see Paul call the young leader Timothy to courageously persevere in the truth and in his calling, not yielding to the pressures of public opinion or the surrounding culture. In this revised BST volume, Stott explores the perennial lessons of Paul's final epistle, highlighting key themes such as guarding, proclaiming, and suffering for the gospel. While the majority of contemporary works on Armenia concentrate on the modern era, *The Kingdom of Armenia* takes its beginning in the third century BC, with the ancient literate peoples of Mesopotamia who had commercial interests in the land of Armenia, and continues with a comprehensive overview through to the end of the Middle Ages. How many times have you tried to change a behavior only to find yourself doing the same thing again? Do these phrases sound familiar? "There I go again!" "I've had this struggle for years, and I just can't seem to win." "I do okay for awhile, but then I get caught in the same old sin." It's easy to be discouraged when we fall into the same old sins, but God, in the Bible, offers hope to repeat offenders. Timothy S. Lane, a pastor, counselor, father, and husband helps you fight the daily, small battles with temptation by looking at the desires that underlie your behaviors, the different stages of temptation, and how honestly going to Christ in repentance and faith will change your desire life. You will learn that you and your sin are no match for God's goodness, power, and grace. Stephanie L. Swinea holds a Bachelor of Science degree in Music Education from Texas Womans University in Denton, TX and a Master of Divinity Degree from the Seminary of the Southwest in Austin, TX. She is an ordained a priest of the Episcopal Church USA. Before becoming a priest, Stephanie was an annual performer as a musician and storyteller at the North Texas Irish Festival in Dallas, TX. She was also an educational consultant for the Texas public schools presenting programs of Irelands stories, history, culture, geography, art, and especially music. While searching for stories about the legendary Saint Patrick, Stephanie discovered the real man behind the myths, Patricius Magonus Sucatus, whose Confession told a story greater than all the myths combined. After four years of research she felt compelled to tell his tale in a medium that makes biographical figures come to life, the historical novel. Stephanie is currently developing another historical novel. She has written several screenplays, has received an option on one and is currently working with a producer on another. She also develops Christian Education materials for her parish, which she intends to publish for wider use at a later date. by photographer Tom Cabbage A mature readers adventure into the life of a complicated Saint caught between fear, faith, passion and restraint during the dark days of the crumbling Roman Empire and primitive Ireland. She came to Brazil on a mission: find the man who ruined her mother's life. Then kill him. Things were moving smoothly for Jeni, a French doll with a nice face, a nice body and a not-so-nice reputation. That is, until she met Mark. And they both could see the storm clouds of Nazi Germany rolling toward the continent. Together, along with a prudish missionary girl and a German double-agent, they form a secret resistance organization. Their mission? Convince the Germans that invading Brazil won't be easy. It's a game of high stakes propaganda poker. Unfortunately, the only cards they have in their hand are an unwanted passenger plane, an airstrip hidden in the jungle and guy who makes really good pancakes. So the team's eclectic engineer cobbles together a machine gun turret, adds some bomb racks and the Ellen Jane

is born. Soon her .30 caliber machine guns and small bomb load are all that stand between Hitler's minions and the coast of Brazil. But Jeni quickly learns that fighting the Nazis won't be the only challenge. Computer programming with Java is easier than it looks. This is the first of three volumes offering a new history of lexicography in and beyond the early modern British Isles. This volume focuses on the period from the end of the Middle Ages to the year 1600, exploring the first printed dictionaries, Latin and foreign language dictionaries, and specialized English wordlists. Offers an updated tutorial for beginners explaining how to use Java to create desktop and Web programs, applications, and web services. The first comprehensive and objective history of the literature of Georgia, revealed to be unique among those of the former Byzantine and Russian empires, both in its quality and its 1500 years' history. It is examined in the context of the extraordinarily diverse influences which affected it - from Greek and Persian to Russian and modern European literature, and the folklore of the Caucasus.
