The second edition of the hugely popular The Clinical Anaesthesia Viva Book builds on the success of the first by providing a thorough review of short and long case questions typically given to Final FRCA viva candidates. An introductory chapter gives invaluable practical advice on preparation for the viva. This is followed by almost 100 short cases and 25 long cases, all based on viva questions posed at recent examinations. Answers have been constructed from a combination of popular textbooks, recent publications and the extensive practical experience of the authors. Short further reading lists are provided for more in-depth preparation. Written by a team of expert consultants and senior trainees with (successful!) experience of the Final FRCA, this second edition of The Clinical Anaesthesia Viva Book, is a must-have for anyone preparing for the Final FRCA viva. The Primary FRCA Structured Oral Examination Study Guide 1 is the definitive revision aid to the Primary FRCA structured oral examination. The single best answer format of questions is invaluable in assessing a trainee's clinical skills and problem-solving abilities. It allows the trainee to demonstrate application of their knowledge to clinical practice. This book comprises six sets of practice papers. Each set contains 30 single best answer questions which cover topics including clinical anaesthesia, pain and intensive care. The questions are based on the recent changes introduced to the written part of the final FRCA examination. The best possible answer to a given clinical scenario is substantiated by a detailed explanation drawn from recent review articles and textbooks in clinical anaesthesia. These questions will enable candidates to assess their clinical knowledge and skills in problem-solving, data interpretation and decision making. This book is essential study material for candidates sitting postgraduate examinations in anaesthesia and intensive care medicine. It is not only an essential guide for trainees but also an invaluable educational resource for all anaesthetists. Graphic Anaesthesia is a compendium of the diagrams, graphs, equations and tables needed in anaesthetic practice. Each page covers a separate topic to aid rapid review and assimilation. The book includes sections covering: physiology pharmacodynamics and kinetics physics equipment anatomy drugs clinical measurement statistics. By combining all the illustrations, equations and tables with concise, clinically relevant explanations, Graphic Anaesthesia is therefore: the ideal revision book for all anaesthetists in training a valuable aide-memoire for senior anaesthetists to use when teaching and examining trainees. From reviews: "Graphic Anaesthesia is a well-written, easy-to-read book, ideal for trainees studying for primary FRCA examinations... It will be an ideal companion for preparing for exams." *Ulster Medical Journal*, May 2016 "Graphic Anaesthesia is an

excellent revision tool that allows trainees approaching exams to prepare in an efficient and simple format. It is a refreshing and unique resource that should be included on any essential revision reading list." *European Journal of Anaesthesiology* 2016; 33: 610. "The diagrams are very clear, the explanations accurate and concise and to pack 245 items into a small reference book is no mean feat.... Each diagram is drawn in just four colours to enable them to be reproduced easily from memory. This intuitive approach was an eye-opener to me and a valuable lesson in simplicity without losing any essential detail. This is something from which many educators could learn and indeed transfer that skill...This is a quality book that could be a useful investment across the spectrum of practitioners involved in anaesthesia and the teaching of anaesthesia." *Journal of Perioperative Practice* March 2017, volume 27, issue 3 This book provides an exam-focused revision guide to both anaesthetic and surgical instruments. This is a comprehensive guide to passing an exam station and includes commonly tested knowledge. The Anaesthetic section includes airway, breathing, circulation and analgesia equipment. About the author Dr Kelvin Yan MRCP AICSM is NIHR Academic Clinical Fellow, University of Oxford and Honorary Clinical Research Fellow, Imperial College London The Objective Structured Clinical Examination or OSCE for short is a familiar and often daunting experience for medical students. This book provides the essential information needed to tackle OSCE stations competently and with confidence. Over 150 topics are covered at the perfect level of detail for candidates preparing for final exams. Using bulleted checklists and a succinct writing style, the authors cover the most important points to remember about the key conditions that students are likely to encounter during OSCEs, all in a brief 2 to 4 pages per condition. Designed for candidates sitting the primary FRCA examination, this book brings together exam questions from recent years and structures them into six practice papers. The format of 90 questions per paper echoes the exam itself. Following each paper a scoring chart and detailed explanations of answers are provided. The questions cover physiology, pharmacology, physics, clinical measurement and statistics as they appear in the primary FRCA. There are questions on all recently added exam topics, and those that now carry stronger emphasis and more weight such as resuscitation, sepsis and trauma. The latest drugs, equipment, monitoring techniques and safety procedures are referenced. Trainees will find this an invaluable tool for exam preparation, whether sitting the FRCA in the UK, through the London College external examiners in many Asian and African countries, or similar exams for anaesthetists in Australasia and North America.
