When Charles Platt set out to answer the question, "Who writes science fiction?" he interviewed almost all the writers who molded the field during the 1960s, 1970s, and 1980s. The profiles that Platt wrote have become a definitive source of information about the lives and careers of Isaac Asimov, Jerry Pournelle, Frank Herbert, Frederik Pohl, and dozens more. Originally published in two volumes, the profiles collected here have been specially updated with afterwords written in 2017. "There has never been a better book about science fiction; it is doubtful that there has ever been a better book about writing of any kind." -The Cleveland Press. "A book of sharp, insightful, beautifully written essays This is quite probably the finest book of its type yet to appear." - Publishers Weekly. "A magnificent achievement, exemplary in its insights, its

structure, its editorial restraint and perspective . . . a monumental book." -Robert Silverberg. "Platt held me spellbound for hours. . . . These are some of the best [interviews] I've ever seen." - Analog magazine. "A superb piece of work . . . full of color and warm empathy, it makes for charming reading." -Alfred Bester. The story, *The Uncertain Generation*, is a follow-up to the authors first novel, *The Uncertainties of Life*. While, both novels are a work of fiction, *The Uncertainties of Life*, covers the problems, the hardships, and the triumphs, of ranch life over a large part of the twentieth century. It also served to point out how the problems of the world, eventually, came to effect ranchers and ranches, even, in the most remote areas. *The Uncertain Generation*, brings us up to the mid nineteen-nineties. While, the ranch setting remains the same, the grandson, the third generation, has taken over the operation of the ranch, and while basic

ranching practices remain somewhat the same, finds himself faced with problems completely different from those of his forbearers. The largest problem being that he is locked into a running battle with a giant corporation, where some of the top personnel show more interest in personal gain than in company profits, and are willing to use any approach to obtain their goals. Although, friendships remain strong, and ranchers continue to be dedicated to one another, and work together in a helpful manner, while at times chiding one another in a good natured manner. The change in the type of livestock and equipment, used in some cases, as well as in morals of the times is quite evident, and also how such change is accepted. The story also shows how inflation has reflected upon the attitudes of people, as our hero is willing to put everything on the line in hopes of making that big score that people of the past just dreamed about. Add a beautiful woman, who fits into today's business world, to tempt

a lonely bachelor. Our hero's frequent reflections upon his previous generations, while making comparisons to his own position in life, and, *The Uncertain Generation*, all adds up to a story of mystery, romance, violence, and even financial manipulation, accustomed to our times. The Code of federal regulations is the codification of the general and permanent rules published in the Federal register by the executive departments and agencies of the federal government. *Agricultural Mechanization and Automation* is a component of *Encyclopedia of Food and Agricultural Sciences, Engineering and Technology Resources* in the global *Encyclopedia of Life Support Systems (EOLSS)*, which is an integrated compendium of twenty one Encyclopedias. The mechanization of farming practices throughout the world has revolutionized food production, enabling it to maintain pace with population growth except in some less-developed countries, most

notably in Africa. Agricultural mechanization has involved the partial or full replacement of human energy and animal-powered equipment (e.g. plows, seeders and harvesters) by engine-driven equipment. The theme on Agricultural Mechanization and Automation cover six main topics: Technology and Power in Agriculture; Farm Machinery; Facilities and Equipment for Livestock Management; Environmental Monitoring; Recovery and Use of Wastes and by-Products; Slaughtering and Processing of Livestock, which are then expanded into multiple subtopics, each as a chapter. These two volumes are aimed at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs. How To Use Implements on Your Small-Scale Farm describes in detail how to use the implements in detail, including their function, how

they are attached and removed from tractors, when to use them, and basic maintenance and repair. Implements and equipment covered include: hitches; PTO shafts; plows, discs, harrows, and Roto-tillers; fertilizers and spreaders; seed drills and planters; cultivators and hoes; sprayers, mowers, rakes, balers, and combines; and material movers and fencing equipment. Basic maintenance is also included. Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries. The latest, extensively updated edition of Farm Power and Machinery Management continues the tradition of providing students, farmers, farm operators, and farm managers with comprehensive information on how to properly manage and optimize the use of mechanized equipment to reduce costs and maximize profits. This full-featured text analyzes the factors that comprise machinery management, explains the

functions of the various machines and mechanisms as they affect economic operation, and offers contemporary approaches and procedures for making management decisions. The authoritative coverage of current management principles and the machinery-operating details make this text an outstanding choice for courses in agricultural education, agricultural mechanization, agricultural business, and agricultural engineering. An understanding of agricultural practices, college algebra, and trigonometry are adequate preparation for using this text. Abundant figures, photographs, and charts, along with problems and laboratory exercises, reinforce the applicability of significant concepts, thereby empowering readers to become successful farm machinery managers and operators. New or updated features and coverage in the Eleventh Edition . . . • photos of tractors, implements, and special crop machines • IRS policy related to farm machinery • expanded list of

timeliness factors • instrumentation available to farm machines • tractor test results • required diesel engine emission control • constantly variable transmission (CVT) • tire data and oil specifications • custom, rental, and estimated costs for farm machinery operations • remote sensing of field conditions • farm safety data • number of machines on US farms • US crop areas and values Biomass to Renewable Energy Processes, Second Edition, explains the theories of biological processes, biomass materials and logistics, and conversion technologies for bioenergy products such as biogas, ethanol, butanol, biodiesel, and synthetic gases. The book discusses anaerobic digestion of waste materials for biogas and hydrogen production, bioethanol and biobutanol production from starch and cellulose, and biodiesel production from plant oils. It addresses thermal processes, including gasification and pyrolysis of agricultural residues and woody biomass.

The text also covers pretreatment technologies, enzymatic reactions, fermentation, and microbiological metabolisms and pathways. "Wolves at our Door", by B. J. Carr, is a controversial and compelling novel about a small rancher and big game guide who finds his livelihood being affected by the reintroduction of wolves into Idaho under a federal program. Will Zane Adams and his way of life survive with the wolves at his door? Additionally he is in love with a wealthy heiress from Detroit. Will his love for heiress Bethany Robins survive the dichotomy of their two worlds? All the while ,someone is trying to kill him!! "Wolves at our Door emerged from Carr's lifelong experience with the wildlife of Northern Idaho. Her opinion of the wolf controversy is known and well articulated through the thoughts and behaviors of the protagonist Zane Adams. Carr believes Adam's views reflect the views of those who live in the wolf area. "Wolves at our Door" is available online here

and in major bookstores everywhere.
